

E-LEARNING

Capital Safety Training offers an interactive **'Introduction to Work at Height module'** and a portfolio of **Health and Safety E-Learning courses** that can supplement or replace your present introductory courses.

THE BENEFITS TO E-LEARNING

1. CAPITAL SAFETY E-LEARN AND BLENDED LEARNING

Capital Safety offers 3 of its Work at Height courses through a combination of E-Learning and Practical Skills training, commonly known as Blended Learning.

- **HS1**
- **ROOF WORKER**
- **BASIC CLIMBER**

Additional courses, including RF Safety are planned. Company specific modules can be developed upon request.

2. WHAT ARE THE BENEFITS?

Here are some of the reasons why E-Learning should play a part in your training, portfolio going forward.

- **HIGHER LEARNING RETENTION THAN TRADITIONAL LEARNING**

For classroom based courses delegates often allow the mind to wander. E-Learning is proven to focus the mind more closely in the one-to-one relationship with the information being given.

- **CAPACITY AND CONSISTENCY**

E-Learning provides a high level of consistency in the learning, as the learned media remains constant and the delivery method the same each and every time.

- **SAVES TIME AND MONEY**

It greatly reduces time away from the job, reduces overall travel costs and allows twice as many delegates to be taught the practical element of the course in 1 Day.

- **EFFECTIVE ADMINISTRATION**

The E-Learning product has an integral Learning Management System that allows you to see your complete suite of E-Learning modules and who has attended which module at the touch of a button.

3. THE COST BENEFITS

Certain courses will always require face to face training but the theory element of the 3 selected courses can be effectively delivered through E-Learning. As a result, 2 practical sessions to be delivered in the same amount of face to face time that 1 course would normally require. This allows Capital Safety to provide you with a 50% saving on the second practical course. Additional savings are made through reduced travel costs and time away from the workplace.

4. ADDITIONAL E-LEARN INTRODUCTORY / REFRESHER MODULES

Capital Safety also offers a suite of Introductory Health & Safety modules. This allows Clients to ensure that they provide on-going training, especially CPD and refresher training to all employees without having to send them away on external courses.

We can create tailored packages of modules that will address both the core health and safety modules and any other additional modules specific to your needs.

6 EASY STEPS TO COMPLETE AN E-LEARNING MODULE

Please contact us on the details below,
to view a free demonstration of the
system or to secure login details.

STEP 1

Log-in using the details provided by Capital Safety.

STEP 2

Clients / departments can be created to separate
different areas of large businesses.

STEP 3

Employees can view the modules that they have been
allocated and their progress in respect of each one.

STEP 4

Allows the system administrator to view the complete
package of modules for their company and see what
has been completed in one easy to manage location.

STEP 5

Complete the course and receive the test result
as a percentage.

STEP 6

Print the Certificate of Attainment, and present at Capital
Safety Training before the Practical Skills session begins.
